1. NATURE OF OPERATION AND GOING CONCERN

Emerita Resources Corp. (formerly Emerita Gold Corp., and Fuller Capital Corp.) (the “Company”, or “Emerita”) was incorporated on October 30, 2009 as 0865140 BC LTD. pursuant to the Business Corporations Act of British Columbia. On January 8, 2013, the Company completed its Qualifying Transaction and ceased to be a Capital Pool Company. The Company changed its name to Emerita Gold Corp. and commenced trading as a Tier 2 Mining Issuer on the TSX Venture Exchange on January 11, 2013 under a new trading symbol “EMO”. The Company has wholly owned Subsidiaries, 7854811 Canada Inc. (inactive), 2244182 Ontario Inc., amalgamated with Emerita (“2244182”) which owns Emerita Gold Espana (formerly Lorica Gold, Sociedad Limitada) (“Emerita Espana”), a company incorporated on May 30, 2012 in Spain. The Company is currently engaged in the acquisition, exploration and development of mineral properties, with its primary focus on the Las Morras Property located in Spain. The head office and principal address of the Company is 65 Queen Street West, Suite 800, Toronto, Ontario, M5H 2M5.

The business of exploring for minerals involves a high degree of risk and there can be no assurance that the current exploration programs will result in profitable operations.

The Company is in the process of exploring its mineral properties and has not yet determined whether these properties contain mineral reserves that are economically recoverable. The recoverability of amounts shown for exploration and evaluation properties is dependent upon the establishment of a sufficient quantity of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production or proceeds from the disposition of these assets. Although the Company has taken steps to verify title to the properties on which it is conducting its exploration activities, these procedures do not guarantee the Company’s title. Property title may be subject to government licensing requirements or regulations, unregistered prior agreements, unregistered claims and non-compliance with regulatory and environmental requirements. The Company’s assets may also be subject to increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and restrictions, and political uncertainty.

These condensed interim consolidated financial statements have been prepared using accounting policies applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of operations. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying financial statements. Such adjustments could be material. Due to continuing operating losses, the Company’s ability to continue as a going concern is dependent on its ability to obtain additional sources of financing. There is no assurance that these funds will be available on terms acceptable to the Company or at all.

2. BASIS OF PREPARATION

Statement of compliance

These condensed interim consolidated financial statements are unaudited and prepared on a condensed basis in accordance with the International Accounting Standards (“IAS”) 34, *Interim Financial Reporting* using accounting policies consistent with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)***Basis of presentation***

These condensed interim consolidated financial statements have been prepared in accordance with the accounting policies described in Note 2 of the Annual Consolidated Financial Statements as at and for the year ended September 30, 2013. Accordingly, these condensed interim consolidated statements for the periods ended March 31, 2014 should be read together with the Annual Consolidated Financial Statements as at and for the year-ended September 30, 2013.

These condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information, and have been prepared using the historical cost basis. Furthermore, these condensed interim consolidated financial statements are presented in Canadian dollars which is the functional currency of the Company and all values are rounded to the nearest dollar.

The preparation of interim financial statements in conformity with IAS 34 requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

These condensed interim consolidated financial statements include the accounts of the Company, 7854811 Canada Inc., and Emerita Espana. All material intercompany transactions and balances between subsidiaries have been eliminated on consolidation.

Approval of the condensed interim consolidated financial statements

These condensed interim consolidated financial statements of the Company for the three and six months ended March 31, 2014 were reviewed, approved and authorized for issue by the Board of Directors of the Company on May 30, 2014.

The weighted average remaining contractual life of the options as of December 31, 2013 is 1.87 years.

6. CAPITAL MANAGEMENT

The Company manages and adjusts its capital structure based on available funds in order to support the acquisition, exploration and development of exploration and evaluation properties. The Board does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The capital of the Company consists of common shares, warrants and options of the Company.

The properties in which the Company currently has an interest are in the exploration and evaluation stage; as such, the Company is dependent on external financing to fund its activities. In order to carry out planned exploration and evaluation and pay for administrative costs, the Company must raise additional amounts. The Company may continue to assess new properties and may seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no significant changes in the Company's approach to capital management during the three and six months ended March 31, 2014.

The Company and its subsidiaries are not currently subject to externally imposed capital requirements.

7. FINANCIAL INSTRUMENTS

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- a) Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- b) Level 2 - Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- c) Level 3 - Inputs for assets and liabilities that are not based on observable market data.

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

The Company's financial instruments include cash and cash equivalent, reclamation deposit, amounts receivable, accounts payable and accrued liabilities.

As at March 31, 2014, the Company's cash equivalents are classified as assets at fair value through profit and loss, and have been classified as Level 2 financial instruments.

The carrying values of these financial instruments reported in the condensed interim statement of financial position approximate their respective fair values due to the relatively short-term nature of these instruments.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

(a) *Credit risk*

Counterparty credit risk is the risk that the financial benefits of contracts with a specific counterparty will be lost if a counterparty defaults on its obligations under the contract. This includes any cash amounts owed to the Company by those counterparties, less any amounts owed to the counterparty by the Company where a legal right of set-off exists and also includes the fair values of contracts with individual counterparties which are recorded in the financial statements.

a. *Trade credit risk*

The Company is not exposed to significant trade credit risk.

b. *Cash and cash equivalents*

In order to manage credit and liquidity risk the Company's policy is to invest only in highly rated investment grade instruments that have maturities of three months or less. Limits are also established based on the type of investment, the counterparty and the credit rating.

(b) *Currency risk*

Currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company's foreign currency risk arises primarily with respect to the Euro from its property interests in Spain and US dollars from operations. Fluctuations in the exchange rates between these currencies and the Canadian dollar could have a material effect on the Company's business, financial condition and results of operations. The Company does not engage in any hedging activity to mitigate this risk.

(c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at March 31, 2014, the Company had a cash and cash equivalents balance of \$558,493 (September 30, 2013 - \$1,712,915) to settle current liabilities of \$177,728 (September 30, 2013 - \$165,289).

(d) Commodity / Equity price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, as it relates to gold, individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company. Commodity price risk is remote as the Company is not a producing entity.
